Debris Removal Recycling and Disposal Resources

Please note – Information listed below may change without notice

Concrete/Asphalt

Concrete and asphalt drop-off recycling fees typically range from no cost to $5/ton versus disposal fees at County Refuse Disposal Sites at $115/ton. Concrete and asphalt are crushed to use for road base. Contractors and haulers are advised to call and verify requirements of any facility where concrete material is to be taken. Further, haul drivers should be provided copies of the accepted debris removal application for lots where such material originated, so that the receiving facility can verify the source of the generated material.

**Metal/Scrap**

Ferrous metals contain iron (e.g., steel); magnets stick to ferrous metal.

Non-ferrous metals do not contain iron (e.g., brass, aluminum, copper). Recology customers may place small household scrap metal items (not smaller than 4 inches long and not larger than 2 feet in any dimension, and weighing less than 25 pounds) in their blue recycling cart.

How to prepare the metal items for disposal: Remove textile, rubber and plastic components. No freon-containing appliances. Metal items must fit loosely in the cart.
Recyclable scrap metal (ferrous and non-ferrous metals) is banned from disposal at County refuse disposal sites. All County refuse disposal sites, as well as a number of other locations, offer recycling for scrap metal.

*Satellite Dish: Remove plastic components first, then recycle according to the rules above.
