COVID-19 radio public service announcement - English February 17, 2022

Everyone has felt the impacts of Covid 19. Sadly, many of us know someone who has become ill or even died from the virus. The truth is, most of those deaths could have been avoided if everyone was vaccinated. In Sonoma County, unvaccinated people are 14 times more likely to end up in the hospital with Covid 19 and 11 times more likely to die from it. Millions of people have been safely vaccinated, and the vaccine is proven to reduce the chance of severe COVID symptoms, including death.

So, what are you waiting for? The pandemic is not over, and the Covid 19 vaccine saves lives. If you are fully vaccinated, get your booster shot.

And while vaccinated people are no longer required to wear a mask in many public places, masks remain a simple way to protect yourself and the people around you. To get all the facts including where you can get your vaccine or booster shot today go to [So Co emergency dot org](https://www.socoemergency.org) or call 2 1 1.
